1. For a particular quarter of a particular year, the chart counts the number of youth in each program at the beginning of the quarter, entries into and exits from the programs during the quarter, and the number of youth in the program at the end of the quarter.
2. Because there are two separate row groupings, gender and race/ethnicity, column totals are the total of # values for either grouping (whose totals should match), not the sum of all entries in the column.

DETENTION UTILIZATION

This chart shows detention population at the start of a quarter, admissions to and exits from detention during the quarter, and population at the end of the quarter.

1. Totals are the sum of # values in gender OR race/ethnicity OR top allegation (the sum for each should match).
2. Average daily population
3. Average length of stay (days) for released population.
